English

Course Modules and Outline

S/N	Module Title	Module Outline
1	Sustainable Operations Management	This module aims to provide students an overview of the practice and important issues involved in production and operations management: value-driven operations management, supply chain management, inventory management, quality management, lean manufacturing, and sustainability management.
2	Economics	This module aims to provide students with a basic understanding of the economic theory and analytical tools that can be used in decision-making and problem solving. The emphasis in this module will be on demand analysis and estimation, production and cost analysis under different market conditions, forecasting and decision-making under uncertainty, covering both Micro and Macro perspectives in the study of economy and its efficiency level through various economic models.
3	Marketing and Branding in a Digital Economy	This module aims to introduce students to the complexity of social media, e-commerce, and network intelligence have on impacting the business world. In addition, this module provides students the understanding on specific knowledge areas of marketing and branding in populist social media networked intelligence to delineate the means of creating and fulfilling these wants and needs.
4	Strategy in Action	This module aims to provide a comprehensive framework for analysing the structure of an industry and competitors. Every organisation competing in an industry needs a competitive strategy. Significant benefits can be gained through an explicit process of formulating strategy, to ensure that the policies and the actions of all members of the organisation are coordinated and directed at a common set of goals.
5	Strategic Negotiation and Communication	The aim of this module is to study the essential topics on negotiation and conflict management illustrated with scenarios from business and day-to-day life. It is also designed to better understand the nature of conflict and its resolution through persuasion, collaboration, and negotiation. Students will learn theories and practices to becoming an effective negotiator, and how to develop negotiation skills and examines the psychological and sociological factors natural to any negotiation process.
6	Organisational Behaviour	This module aims to provide students with tools to effectively manage and lead people in organisations. Students will be exposed to a variety of tools, structures, and cultures for successful leadership. Students will analyse factors that have the greatest impact on organisational behaviour; from managing individuals and understanding group dynamics to managing conflict and initiating change
